#### MINE CONDEMNED BY ENGINEER SOLD ON STRENGTH OF HIS REPORT

George H. Utter Sells Carlisle Group in Grant County to New York Syndicate for \$300,000.

#### PROPERTIES HAD BEEN IDLE FOR 18 YEARS

English Engineer in 1889 Found Mine Worthless as Gold Proposition on Account of Obstructing Copper.

Varied and wonderful are the things that happen in the mining business. But to sell a group of mines for several hundred thousand dollars on the strength of an engineer's report, which condemned the mine, and to sell it for the very reason for which it was condemned, is proving the impossible rather closely, says the Silver City Independent of yesterday. The Silver City paper goes on to declare that this is exactly what happened in Silver City last week, when George H. Utter sold the Carlisle group of mines at Steepershook to New York capitalists for \$300,000 net. The deal constitutes one of the largest that has taken place in Grant county for many years, the largest, in fact, since Mr. Utter sold the Cleveland group at Pecos Mesa.

#### MRS. THOMSON TELLS WOMEN

How She Was Helped During Change of Life by Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"I am just 52 years of age and during Change of Life I suffered for six years terribly. I tried several doctors but none seemed to give me any relief. Every month the pains were intense in both sides, and made me so weak that I had to go to bed. At last a friend recommended Lydia E. Pinkham's Vegetable Compound to me and I tried it at once and found much relief. After that I had no pains at all and could do my housework and shopping the same as always. For years I have praised Lydia E. Pinkham's Vegetable Compound for what it has done for me, and shall always recommend it as a woman's friend. You are at liberty to use my letter in any way."—Mrs. Thomson, 643 W. Russell St., Philadelphia, Pa.

Change of life is one of the most critical periods of a woman's existence. Women everywhere should remember that there is no other remedy known to carry women so successfully through this trying period as Lydia E. Pinkham's Vegetable Compound.

If you want special advice write to Lydia E. Pinkham Medicine Co. (Confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

by the Steepershook Development Company in March, 1914. The mines had been practically abandoned for eighteen years, though their early history was one of production running into the millions, and all the surface improvements had disappeared. Mr. Utter knew something of the early history of the mines and, being closely in touch with the trend of modern mining development, with its improving methods of separation and increasing demands for the base metals, decided that the district presented a good opening for investment and he backed his judgment by buying the five groups of mines centering at Steepershook.

He immediately set to work to clean up, unwater and explore his property, in itself an expensive proposition. He tackled the hardest first, which was the Jim Crow. Now, before he has had time to give the Carlisle any attention he has sold it to a company which will proceed at once to install machinery and work the mine. The buyers, who were represented here by W. B. Duval, consist of an eastern syndicate, with headquarters in New York, whose resources and ability to operate the mine to its full capacity cannot be doubted for a moment. W. K. Welch, a New York engineer, who has had years of experience in the west and southwest, made the expert examination of the property, insofar as this was possible, on account of the water. Mr. Duval is now in El Paso, placing orders for the necessary machinery and supplies of all kinds, such as will be required to unwater the mine and equip it for the taking out of the large bodies of ore. That a large mill will be erected on the property is assured and the possibilities of a branch line of railroad connecting between Lordsburg and Dumas are not as remote as might be supposed.

Advised Report Relied On. A sale involving such a large sum of money being made with the mine full of water is somewhat unusual, especially in a mine which had been abandoned for eighteen years, but the engineer's report referred to above was largely responsible. This report, dated 1889, was made by an eminent English engineer named Clayton. It was obtained from the offices of the London Exploration company by Mr. Utter, after a good deal of trouble and expense. With it were five maps, accurately drawn to scale and covering the entire underground workings of the mine. Clayton condemned the mine in his report in no uncertain terms, and he told in minute detail why it was so good. The vein was impure, he said, but the free gold was carried in a narrow pay streak on the hanging wall. The vein matter was composed of base metals that could not possibly be worked at a profit. These were coarse crystalline compounds consisting of sulphides, chalcoprite, galena and others with low values in gold and silver. There were 200,000 tons of this stuff in sight. With British thoroughness he had even estimated the amount of valueless ore in sight. Twenty-seven years later this sold the mine it was supposed to dump for these base ores are no longer valued, but are actually more sought after than those of gold.

Professor Clayton's report was backed by evidence found in the upper portion of the workings and by the appearance throughout the immense dumps of the ore named. Altogether it is another case of courts opened in search of gold ore proving a bonanza for the man who is after other ores of copper, lead and zinc through being able to take them out of combinations that baffled the metallurgists of twenty years ago.

Three Claims and Millsite. The Carlisle group consists of three claims and a millsite. It is located 13 miles west of Silver City and fifteen miles north and east of Bonanza, Ariz., which is the supply point. It is opened to a depth of 837 feet by a three-compartment shaft and has in the neighborhood of two miles of workings. This property, after producing millions in gold, was sold to the London Exploration company for \$1,200,000 and about a million spent in further development in search of high-grade gold ore. The next owner was the Steepershook Development company, which sold to Mr. Utter after holding the property many years.

The resumption of mining operations on a large scale at Steepershook means a great deal for Grant county, which is already the greatest metal producer of the state. With a good road it would mean much more to Silver City than it does under present conditions. The Carlisle group constituted only

#### TO EXPLORE STATE LANDS FOR GAS AND OIL

Examiner for Oklahoma Syndicate Preparing to Make a Report to Principals After Long Examination.

Santa Fe, N. M., Nov. 3.—R. L. Lunford, vice president and examining representative of the recently incorporated New Mexico Petroleum and Gas Development company, in which Oklahoma and Ohio men are interested, has just finished a trip of almost 1200 miles through various sections of New Mexico examining the state for oil prospects and with a view to extensive exploration by his company if leases can be secured. Lunford and his associates were interested in investigating the oil outlook in New Mexico by Land Commissioner Robert P. Ervin, who some months ago sent out a circular letter to oil men all over the country inviting investigations of the oil resources of this state. The land commissioner's letter had to do with the state in general, on the basis that development of oil in any section would hardly fail to be of material benefit in enhancing values of state lands. Mr. Lunford believes that surface indications and conditions in a number of sections warrant extensive exploration and will so recommend in his report.

#### CHAVES COUNTY WILL HAVE 12 TEACHERS AT BIG CONVENTION

Roswell, N. M., Nov. 3.—Many of the city and county teachers are already making arrangements to attend the New Mexico Educational association meeting that will be held in Albuquerque from the 29th to the 24th of this month. Both city superintendent W. O. Hall and County Superintendent C. C. Hill have urged all teachers who could to attend. From present indications at least a dozen will attend from this county.

#### SILVER CITY NORMAL HAS TWO ENTRIES FOR ORATORICAL CONTEST

Silver City, N. M., Nov. 3.—The Normal will have at least two representatives in the 1915 state oratorical contest to be held at Albuquerque on November 22 or 23. The contests will be held in conjunction with the State Teachers' association meeting. The Normal will be represented in the oratorical contest for institutions above high school rank by George D. Evans, while several students have expressed their intention of entering the high school declamation contest. Try-outs are to be held in the near future and those winning in these will be sent to Albuquerque by the school, where they will probably remain for several days. All the larger high schools and colleges of the state will be represented in the contests.

Announcement has been made that the state poultry show will be held in the store at Third and Gold avenues formerly occupied by the Hild-Spitz company. The accessible location is expected to draw a large attendance. A small part of Mr. Utter's holdings in the Steepershook district, he still owns the Jim Crow group, eight claims, the East Camp group, eight claims, New Year's group, three claims, and the Summit group, five claims. The Carlisle lies in the center of these. The new syndicate has taken options on the claims on the Carlisle extension, some of which are owned by Jesse V. Adams and Nat Scruet of Silver City. The amount of ground bought and held under option totals about 120 acres.

#### STOCKERS AND FEEDERS 75 PER CENT OF THE KANSAS CITY SUPPLY

Kansas City Stock Yards, Nov. 1.—Cattle trade last week was satisfactory to sellers after Monday, a good strong market on all kinds every day, and cattle took good hills. The supply today is 33,000 head and sales are steady to strong on both killing and country grades. As was the case last week, about 75 per cent of the supply in stockers and feeders. The good demand of last week continues, and there is ample outlet, Kansas is the heaviest buyer, Missouri a good second, and Illinois buying more cattle now than any time in two years. On Wednesday last week 15,400 stockers and feeders were shipped out to the country, a new high record for a single day here, and during the week, 51,787 head went out, biggest week ever known here. Also, for the month of October a new high record of stocker and feeder shipments out was made, at 185,490 head. The Panhandle and New Mexico had choice yearlings here today up to \$3.50, good yearlings and two at \$7 to \$7.75, some plain feeders weighing about 1,000 pounds at \$6.50 to \$7.10. Colorado had plain horned feeders weighing 900 pounds at \$6.85, dehorned feeders weighing 1000 pounds at \$7.00, yearlings and two at \$7.00 to \$7.50, cows \$5.50 to \$6.25. Twenty-four cars Montana beef steers were included today, 1,170 to 1,320 pounds average, which sold mostly at \$7.60, a few at 7.50. Montana beef steers sold here last Thursday at \$7.50 to \$8.50, cows at \$6.65. Oregon feeders sold at \$7.15 today, cows \$6.00. Western Kansas has first class wheat prospects, and is buying cattle to graze the wheat fields. Fed steers sold up to \$18 today, and the margin between feeders and finished steers, in conjunction with corn at 49 to 50 cents a bushel, is stimulating demand for feeding steers. Sheep receipts, 13,000; market strong. Lambs are quotable up to \$8.75; some medium range lambs today at \$8.40 to \$8.60; light weight New Mexican feeding lambs, choice, \$8.25 to \$8.40; good western feeders \$5.90 to \$6.25. Mexican feeders' steers up to \$7.75. Fat cows are worth up to \$3.85; weathers, \$6.50; yearlings, both fat and feeding, around \$7.00. Breeding ewes find ready sale up to \$7.00, according to age, and feeding ewes sell at \$4.75 to \$5.90. "Shortages" is written all over the probable run of sheep and lambs here for the next two months, and strong prices are predicted by both buyers and sellers. J. A. RICKART.

#### GOVERNOR WILL SEE FOOTBALL GAME AT SILVER CITY TUESDAY

Silver City, N. M., Nov. 3.—Governor McDonald has promised to be here Tuesday to witness the football game between the University of Arizona and state Normal school football teams. The governor will initiate the game by a kick-off. The Arizona team has not been defeated this season. Neither has the normal school team, which is composed of a husky aggregation of football players. The normal school team will play the El Paso high school here on Thursday of this week.

#### 25 CENTS DESTROYS YOUR DANDRUFF AND STOPS FALLING HAIR

Save your hair! Make it thick, wavy and beautiful—try this! This, brittle, colorless and scraggy hair is made evidence of a neglected scalp of dandruff—that awful scourge. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverishness and itching scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Danderine tonight—now—no time—will surely save your hair. Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and after the first application your hair will take on that life, lustre and luxuriance which is so beautiful. It will become wavy and fluffy and have the appearance of abundance, an incomparable gloss and softness, but what will please you most will be after just a few weeks' use, when you will actually see a lot of fine, downy hair—new hair—growing all over the scalp.

#### ENGINEER SAYS HE NEEDS ANOTHER SPRINKLER

Can't Attack Dust Nuisance Properly With Present Equipment; Wet North Fourth Twice Yesterday.

That North Fourth street was twice sprinkled yesterday morning and that the city as a whole cannot be properly sprinkled until another sprinkler is provided were the chief points of a statement made today by Acting City Engineer Hutchinson in reply to a complaint from North Fourth street residents regarding the dusty condition of the thoroughfare. "As for the dust on North Fourth street," said Mr. Hutchinson, after stating that the street was twice wet down yesterday, "any resident who has lived along the street for any length of time will tell you that three hours after it is sprinkled not a sign of the wetting remains, especially if a warm sun is on the job. "No man can undertake to sprinkle a dusty city like this properly with the present equipment. What we need are three sprinklers going in the lowland section and one in the highlands. One, I think, is sufficient to hold the dust in check in the highland district. In the lowlands, however, we should have a sprinkler for constant service on the main streets and two to go over the north and south residence districts. With such an equipment the dust nuisance would be pretty well overcome. "At the present time we have three sprinklers in all. One is used in the highlands and two are nominally assigned for regular service in the lowlands. As a matter of fact, however, we are compelled to take one of the lowland sprinklers out of service occasionally for certain city work, such as patch work on the roads and cleaning dumps. Until we get another sprinkler, no one charged with the care of the streets can attack the dust nuisance properly."

#### FORM RELIEF BOARD TO AID STRANDED PYTHIANS

Mineral Lodge, K. of P., and the Pythian National committee have formed a joint permanent relief board, to consist of three members from each organization. The board is made up of J. J. Daly, C. L. Bernhardt, H. P. Poole, G. T. French, C. O. Cushman and C. A. McLean.

#### Hadith Cheaper Anyway.

London, Nov. 3.—While most commodities have grown steadily dearer since war began, the price of radium shows a drop of about a thousand dollars a gram in the past year. The reason is that some people who held limited quantities of the available supply were compelled to sell at a loss. The British army medical department plans to use radium treatment for the benefit of obstinate cases of rheumatism contracted in the trenches.

and cakes will convince the most skeptical that as matters we have no superior and it's a question even about equals. If you think we are too conceited about our baking, put us to the test by trying either our bread or cake or both. Then you'll say we are not conceited enough.

#### GERMAN ELECTRICAL CORPORATION HARD HIT BY THE WAR

[Associated Press Correspondence] Berlin, Oct. 29.—The famous "A. E. G.," the German electrical company which next to Krupp is the empire's largest industrial undertaking, has published some figures showing the effects of war on its business. Of its huge staff 20,500 have been called to the colors and 520 of these have been killed while 450 have received the Iron Cross. The company has thus far paid out \$1,250,000 in war benefits to dependants of its employees. Its war orders have been so large that it has \$1,500,000 more in the bank than a year ago. Its present balance reaching nearly \$21,000,000. The company has invested \$2,250,000 in the German war loan, and \$200,000 in the Austrian loan. There are just as many orders on the company's books as a year ago, although its entire foreign business has stopped.

#### HYPONOTISTS ON STAFF OF ALL WAR HOSPITALS

[Associated Press Correspondence] London, Oct. 29.—Practically every British hospital now has on its staff one or more physicians trained in administering hypnotic treatment. According to the medical correspondent of the Daily Mail the results obtained have in many cases been little short of miraculous. The chief use of hypnosis has been in cases of shell-shock where, in addition to any actual soundings, the patient is suffering from a pronounced disorganization of the nervous system. This may take the form of complete or partial blindness, loss of hearing or speech, paralysis, melancholia or loss of memory. The treatment consists of hypnotizing the patient, and while he is in the hypnotic state the operator coaxes him to exercise those senses and functions which previously had been lost or quiescent. Then the lost sight or memory is gradually awakened in the un hypnotized state, and, according to the Mail's correspondent, a complete cure is almost always merely a question of time.

#### TRAFFIC COP BEATS IT FOR THE TALL AND UNGUT

No Believer in Signs, Miller Takes to Woods When Hinted He May Be Used as Billboard Repository.

Policeman N. M. Miller, who directs traffic at Central avenue and Second street, got leave of absence yesterday to go on a bear hunt in the Black mountains with R. L. Hunt and Dave Sorrells. Miller learned that the man who is putting up the advertising street signs wants the city to let him use its posts. Miller has a post in the midst of the most conspicuous scenery in the city and he is the most conspicuous perpendicular thing in it; and a shiver went through him when he heard that the sign man was looking for good places on which to hang Lydia Pinkham's Testimonials. He feared that from lamp posts the sign man would turn his attention to pig posts. And on top of the fear came rumors. So Miller lit out for the woods.

#### The Treatment of Influenza or La Grippe

It is quite refreshing these days to read of a clearly defined treatment for influenza or La Grippe. In an article in the "Lancet-Clinic," Dr. James Bell, of New York City, says he is convinced that too much medication is both unnecessary and harmful. When called to a case of influenza, the patient is usually seen when the fever is present, as the chill which occasionally usher in the disease, has generally passed away. Dr. Bell then orders the patient to be opened freely with salts. "Acetone" or citrate of magnesia. For the high fever, severe headache, pain and general soreness, one Anti-Influenza Tablet every three hours is quickly followed by complete relief. Ask for Anti-Influenza Tablets. They are also recommended for headache, neuralgia and all pains.
